Re: Disabling the Cache Using a Keyboard

1. Turn on the game.
2. During the boot-up sequence, when the message "Press F2 to enter setup, <ESC> for Boot Menu" appears at the bottom of the screen, Press <F2>.
3. Using the right arrow, highlight the "Advanced Menu" tab at the top of the screen.
4. Using the down arrow, highlight "Cache Memory".
5. Press <Enter>.
6. If "enabled" appears, use the +/- keys on the numeric keypad to change to "disabled", if "disabled" appears continue with step 7.
7. Press <ESC> to return to the "Advanced Menu".
8. Press <ESC> again.
9. Make sure "Exit Saving Changes" is highlighted, if it is not highlighted use the +/- keys on the numeric keypad to highlight it.
10. Press <Enter>.
11. When the message "Setup Configuration, Save configuration changes and exit now?" appears, highlight "yes" and Press <Enter>.
