## FIELD BULLETIN

**Issue:** In linked Megatouch and TouchTunes machines, each system addresses pricing differently, which can cause discrepancies between their books. However, you can modify the Megatouch Coin-In Table so that the books match more closely.

**Games Affected:** Megatouch systems that are linked to a TouchTunes jukebox.

**Symptoms:** There will be a books discrepancy between linked Megatouch and TouchTunes machines.

**Solution:** To set the pricing on the Megatouch to minimize discrepancies:

1. Enter Operator Setup on the Megatouch by pressing the SETUP button.
2. Touch **Credits/Pricing**.
3. Touch **Quick Price Setup** and select the pricing option that you wish to use, then touch the < button in the top-left corner of the screen to return to the Credits/Pricing Menu.
4. Touch **Coin-In**.
5. You will now need to adjust the Coin-In Table based upon the values you set in Quick Price Setup. Coin-In values will differ depending on whether you selected 6, 4, or 3 Credits for \$1.00 in Quick Price Setup.

*To change the Coin-In Table:* Starting with the bottom of the screen, change the values in the table by touching the **EDIT** buttons to the right of the values and then entering the new value. To eliminate a row, touch **EDIT** and then select **0**. After you've done this, adjust the "Credits" column by using the + and - buttons on either side of the credit field you want to change. To eliminate a row, set it to **0**.

**Adjust your Megatouch's Coin-In Table as shown in the image for each pricing option.**

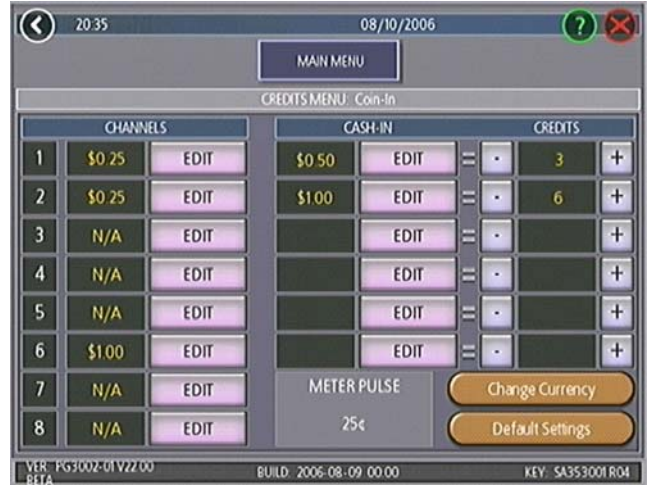

### 3 CREDITS FOR \$1.00:

**4 CREDITS FOR \$1.00:**

**6 CREDITS FOR \$1.00:**

- When you are finished setting the Coin-In table, touch **Main Menu**, then touch the **TouchTunes** button.
- Ensure that "Number of Merit Credits per TouchTunes Song" is set to the pricing you wish it to be.

**NOTE: TouchTunes charges 50 cents per song play, so however you decide to set your pricing, please be sure that the Megatouch is collecting at least 50 cents per TouchTunes play.**

To determine how much a song will cost to play from the Megatouch, multiply "Number of Merit Credits per TouchTunes Song" by the base price of a credit that you selected (i.e., 3 credits for \$1.00 = \$0.33 base credit, 4 credits for \$1.00 = \$0.25 base credit, and 6 credits for \$1.00 = \$0.16 base credit).

**Example: If pricing is set to 4 credits for \$1.00, the base credit would be 25 cents, so if the Number of Merit Credits per TouchTunes Song is set to "1", you would be charging 25 cents per song play; if Merit Credits per TouchTunes Song was set to "2", you would be charging 50 cents per song play; if it is set to "3", you would be charging 75 cents per song play.**

- When you are finished setting your pricing, touch the **X** button and confirm that you want to exit out of Operator Setup.
