Re: New coin mech/bill acceptor unit for countertop games.

Merit Industries is preparing to release two new coin mech/bill acceptor units for countertop games. One unit is designed to work with CRT-260 based games (Model # G20-100-003, serial numbers 370001 and up) and the other is designed to work with the new Megatouch XL games (Model # G20-101-001).

These units are not interchangeable. Installing a coin mech/bill acceptor unit into the wrong type of game **will** cause serious damage to the game.

The part number for the CRT-260 coin mech/bill acceptor kit is KUV-106-027. The part number for the CRT-260 coin mech/bill acceptor assembly is SA0040-01.

The part number for the XL coin mech/bill acceptor kit is KUV-107-001. The part number for the XL coin mech/bill acceptor assembly is SA0040-02.

To order your kit, or if you have any questions, contact Merit Customer Service at 1-800-445-9353.
