Re: Merit Industries Dart Announcement

Merit Industries announced in March 2001 that it was no longer manufacturing its coin-operated Dart product line. Since that time, Merit has continued to provide spare parts and hardware repair for the Dart products. Merit continues to provide these services; however, effective November 1, 2002, software support for DART LEAGUE TRACKER, SCORPION 9000, and SCORPION DX products will only be available through the FAQ's accessible at our www.meritind.com and www.scorpiondarts.com Web sites. Customer Service Representatives and Technical Support Representatives will no longer provide phone support on these discontinued products.

Merit Industries, the world's leading manufacturer of coin-operated touchscreen amusement games, will continue to provide complete support for the over 150,000 Megatouch Touchscreen Video products as well as MegaNet and TournaMAXX-connected functions.
