Re: Replacing 500-Note with 700-Note Bill Acceptors in Aurora Games

If your Aurora game has a 500-note bill acceptor, you may replace it with your own 700-note stacker, if desired. To do so, you must have a rear door with one of the bosses on the door removed (see Figure 1).

If your door does not already have the specified boss removed, then you may carefully remove it, making sure not to damage the plastic or finish in the surrounding area.

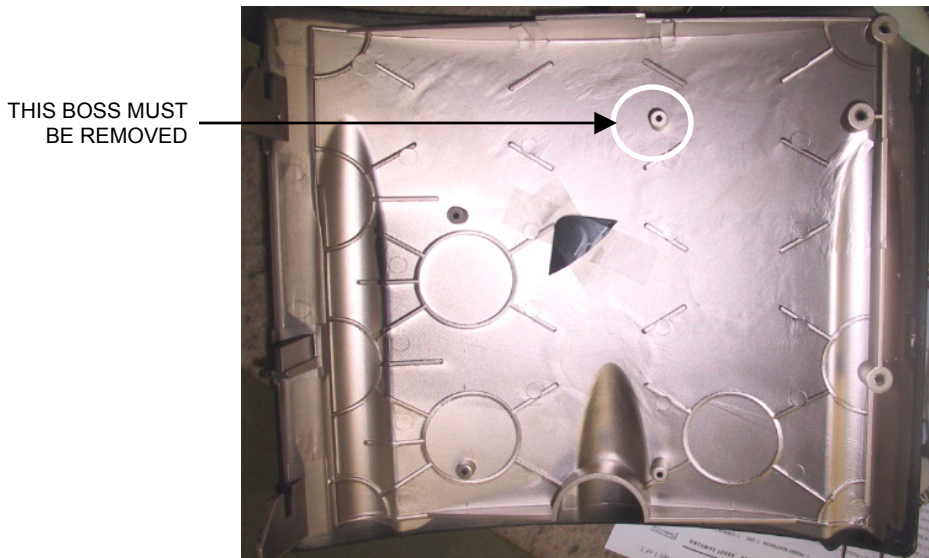

FIGURE 1 – AURORA REAR DOOR FROM THE INSIDE

After installing the 700-note stacker, you will also have to remove the locking cash bracket and not reinstall it. Although each cash bracket has a different key, all Aurora games built with a 500-note stacker and the locking cash bracket, have the same key for the rear door, so it may be beneficial to change the lock on your game.
