FIELD BULLETIN

Issue: Two minor issues have been discovered in the Megatouch 2011 software—a player cheat has been found in the Little Shop of Treasures game, along with a few corrupted images in Penthouse Photo Hunt (Ion only).

Games Affected: Ion and Force systems running software versions V34.01 and V28.30, respectively.

Solution: AMI is issuing a free patch to correct these issues. When the patch is installed, your version number will have a “p25” listed at the end of it.

For MegaNet-connected games: There is no need to do anything to your machine itself. The patch to resolve these issues will be sent to your connected machines.

If your game is not MegaNet-connected: You can download the patch from our Web site and install it on your game with a USB pen, CD, or DVD. To download the patch, visit www.amientertainment.com > [Support](#) > [Megatouch Support Center](#) > [Software Downloads](#).

Remember: AMI also offers MegaNet Core, which is a *completely free* connection to the MegaNet servers that automatically downloads this and any other corrective patch directly onto your registered machines. There'll be no need to do anything on your end, so get connected today!

If you have any questions please contact AMI Technical Support by phone at 800-523-2760 or 215-826-1400, or by e-mail at TechCenter@amientertainment.com.
