After conducting our review of the Merit Megatouch Ion 2009 Software, I have determined to “except” it from the ban imposed by this Division on March 31, 1983, by way of Bulletin Number 2430, Item 3. This Division’s ban on video machines was affirmed by the Appellate Division in Sidney Rosenkranz, et. Seq., v. John F. Vassallo, Jr., Director of the State Division of Alcoholic Beverage Control, 193 N.J. Super. 319, (1984), 473 A.2d 991.

Accordingly, this machine may be placed and operated in licensed premises provided the following conditions are complied with:

1. The machine may only accept no more than fifty cents (\$.50) per player with a two player limit.
2. The machine may not “build-up” credits.
3. The machine must have a lock-out coil which will not permit more than four coins to be deposited into the machine at one time.
4. The machine may not have a port of jack for a computer keyboard that can be used to alter the software or change any outcomes of the device.
5. The Megatouch Ion 2009 device does not operate using EPROMS. Rather, the software is loaded into a hard drive which controls all machine operations. The identification of the software on the hard drive for this device is listed below:

Although a Kobetron signature is not available for this storage medium, **Gaming Laboratories International, LLC** has developed a software tool to analyze a Hard Drive and assign a unique signature to the contents of the Hard Drive. The Merit Megatouch Ion 2009 software does NOT operate using EPROMS. Rather, the software is loaded from a DVD and stored on a Hard Drive which controls all machine operations. The information from our analysis poll is listed below:

Package ID	Version	Path	GLI Verify CDCK Signature	GLI Verify SHA-1 Signature	MD-5 Signature	ABC Excep. #
KUV-110-162-02	30.23	/root/checksum	482A	F69EA9F6DAB51 34684CCCB05AD 19E0A440559E47	5E34BAE9F87C 710E7D6E84C0 9F5C2DB8	73

6. You must provide this Division with the signature chip of this machine within ten days of receipt of this letter.
7. The machine must display an authorization code which will read "ABC Exception Number 73."
8. You, the manufacturer, must provide this Division with a written certification stating that the machine has been manufactured and operates in the above described manner. The certification must also state that the machine has been designed and manufactured "for entertainment only" and "this program cannot be changed."

A copy of this exception must be furnished to the licensee on whose premises the machine is placed and must be exhibited to the undersigned or his representatives upon request.

The person placing the video device in the licensed premises, must notify the Division of Alcoholic Beverage Control, P.O. Box 87, Trenton, New Jersey 08625-0087, of the name and address of the licensed premises on which the game is placed, the serial number of the machine and the name of the owner or lessor of the game within 48 hours of its placement.

The machine may be played based on a time limit pursuant to the following prerequisites:

- A. The time limit mode is chosen by a player after coins or dollar bill are inserted.
- B. The machine cannot build up or award any additional time after play begins.
- C. The machine cannot award additional credits or tokens to a player.

- D. Once the time limit mode is chosen the lock out coil is activated and no additional coins or bills will be accepted by the machine until the game has ended.

Very truly yours,

Jerry Fischer
Director
