Re: Linking Megatouch® Games with TouchTunes® Gen 3 Jukeboxes

TouchTunes is releasing Gen 3 hardware and software, which does not currently support the link with Megatouch games. TouchTunes may also decide to upgrade existing Gen 2 units to Gen 3 software in the future. If you are linking your Megatouch game to a TouchTunes jukebox, be advised that in order for the link to continue to work, the jukebox has to remain at Gen 2 (version 2.4.0-95) software.

Merit remains committed to continue support for the existing Megatouch / TouchTunes link. If you have any concerns about Gen 3 software, you should contact TouchTunes, as they have dropped the support for the link in their latest software release and do not currently have plans to implement it.

If you have any questions, please contact Merit Customer Service and Technical Support by phone at 215-826-1400 or 800-523-2760, or by e-mail at TechCenter@meritgames.com.
